

Accessibility Settings

Type the information below into a Word document. Correct any spelling or grammar mistakes as you type.

Text Size

Text size settings help people read words more clearly on a computer or tablet. Larger text can help people who have difficulty seeing small writing.

Voice Typing

Voice typing lets people speak into a microphone instead of typing with a keyboard. This can help users who find typing difficult.

Screen Readers

Screen readers read text aloud for users with vision impairments. This accessibility feature helps people use websites and apps more easily.
